

PETHUB: Beginner's Guide to Pet Care

Feeding

Provide a balanced diet suitable for your pet's breed and age. Avoid human foods like chocolate, onions, and grapes. Fresh water should always be available. Consult your vet for a personalized meal plan.

Grooming

Brush your pet regularly to reduce shedding and prevent tangles. Bathe them as needed, usually once a month. Don't forget nail trims, ear cleaning, and dental hygiene!

Toys and Enrichment

Interactive toys keep pets mentally and physically stimulated. Rotate toys to keep things fresh. Chew toys can also help with teething and anxiety relief.

Vet Visits

Schedule regular check-ups at least once a year. Keep up with vaccinations, flea and tick prevention, and dental exams. If your pet shows signs of illness or changes in behavior, don't delay the vet visit.
